

☺ Teaching Multiplication Facts in Nine Stress-free, Easy Weeks

Adapted from Tom Roy, Ph.D., Marzano Research Lab

- Students who have not learned the facts often see the job as too big. After all, there are 100 facts!
- They should demonstrate what they do know and then focus on a small part of the remaining facts.
- They should do a few each week...

Multiplication Table (100 facts)

- Stress that there are really only 3 because 3×4 and 4×3 have the same answer.
- Send them home.
- Call home to get someone to drill every day.
- Form a study group to drill during the day.
- Test every day.
- Post small posters of the four around the room.
- Continue each week until there are no facts left.
